This collection designed by Shin and Tomoko Azumi is suitable for both residential and contract situations. The range comprises asymmetric seat units with two and three-seat sofas that can be used alone, or combined with a corner ottoman to create larger seating arrangements. A moveable armrest is also available, and low tables with acid-etched glass tops complete the collection. Frames are of solid beech and panel construction, upholstered in graded CMHR foams. Legs and table frames are of satin-chromed steel. The seating is available in a choice of fabric coverings. Seat height 410mm

sandblasted glass tables are available in two sizes - **hm30i** is 575 x 575mm; **hm30j** is 1150 x 575mm

**hm30g** can be used either as a corner element or as an ottoman

the armrest **hm30h** can be placed wherever it's needed, shown here with **hm30c**, **hm30g**, **hm30f** and **hm30j** table
