Linnea
Bench Desking Range

Modesty Panels

Modesty panels are an optional extra and can be specified at the time of purchase or retrospectively should a requirement arise.

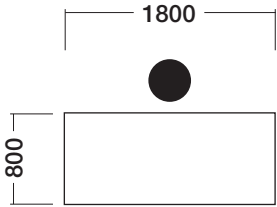

Rectangular Bench

Rectangular bench desking offers the user a traditional workspace. The range is available in various widths and depths to suit all applications. Optional modesty panels and cable trays are available to compliment the workstation. Shown in brilliant white metalwork with white MFC tops, Linnea offers the user a modern and contemporary workstation.

Double Bench

Double Bench workstations share components reducing the number of legs required. In addition, sliding tops are standard on all double configurations providing simple and easy to access high capacity wire management trays. Meeting extensions are compatible with double benches and are ideal for meetings and increasing the user's desk space without the need for leg supports.

Double Bench

Linnea double bench workstations can be configured with desk extensions to maximise the users working space. Each desk top has been designed to retract towards the user enabling easy access to the high capacity wire management tray. The top can be locked in the open and closed position with an optional extra 'locking pin'.

Double Bench

Double bench desks are manufactured with fully interchangeable components enabling runs of desking to be increased, reduced or separated into smaller runs. Management rail screens can be specified compatible with screen mounted fixing for monitor arms. This can be used in high density applications to provide the user with the maximum desk space by suspending the monitor above the desk.

600mm Deep Double Bench

Space is a premium in most offices, in instance Linnea can be specified at a reduced depth of 600mm deep per person. When specified to the reduced depth the main strengths of the product remain, high capacity wire management and sliding tops are a standard feature of the 600mm deep version ensuring range consistency.

Rectangular Workstation Shared Leg Insert

Rectangular single bench desks when configured end to end can be specified with a shared intermediate leg. This solution provides the users with the maximum use of the available space below the workstation surface. The shared leg also ensures the clean lines and clutter free look of the product is maintained.

Shown:
