

Tables

Fascino-2 sets high standards: a fixed table leg system that is both open and diverse. A program designed for higher class seating and an executive working style. Light and intriguingly delicate, each model is a definite enhancement at a conference or meeting. Modern and transparent is also the philosophy behind the table - a space to think, move, talk and act.

An individual in both presentation and finishing, Fascino-2 is the perfect table for every idea and concept. A range of dimensions, tops and surfaces create many different environments. Either a solitary highlight or the perfect table group for conferences. As a rectangle, shallow oval, full oval,

ellipse or round. With a satin glass top, quality wooden veneer, or durable laminate finish and stable cast aluminum frame. All models with wooden or artificial surfaces are equipped with electrical connections and cable ducts. Beauty inspires.

Fascino-2 in the large ellipse conference version with a walnut surface. An exclusive table for conferences where style and interiors have an impact. Combined here with Axos conference chairs.

The wooden tabletops are perfectly crafted. The bevelled edges make the tables appear light and airy.

Silicon rings hold the glass top securely and are virtually invisible.

Integrated connection boxes for wooden tops, revolving or swiveling. Cable ducts and channels are additional extras. Multiple configurations for power and data connections.

Transparent and light, the frame is available in black, brilliant silver, polished aluminum or polished chrome.

Table with wooden top / laminate surfaces

- _ Feet of cast aluminum
- _ Slim, transparent form
- _ Light and airy appearance
- _ Wide range of dimensions and special sizes available
- _ 30 mm MDF top

Premium products

It is often the case that the terminology surrounding new innovations becomes a hindrance rather than a help. High-flown language is frequently used and misused for promotional reasons and this can obscure information relating to actual, rather than pseudo innovations. This is why we are particularly pleased that customers can now not only experience the quality of our products, they can see it too: we are the first manufacturer to be granted the right to label our products with the official "Premium Product" seal, awarded by the LGA testing company and TÜV Rheinland Group certification body. In addition, we have now won yet another accolade, best "quality office". In effect, this means that every Interstuhl product provides an optimum sitting environment and that all owners of Interstuhl chairs can rest assured that they have chosen the best possible product. This then has an effect on other colleagues and the working day as a whole. And we are more than happy to put a 5-year guarantee for everyone's peace of mind. However, we must share the praise for our innovative seating solutions with the institutes that are always ready to support us in their development; we are sure that we will continue to work together in the future.

Quality Office

Issued by the Verband Büro-, Sitz- und Objektmöbel e.V., the German Standards Institute (DIN), the Verwaltungs- und Berufsgenossenschaft, INQA Büro, Initiative neue Qualität der Büroarbeit, and the Federal Institute for Occupational Safety and Health.
