TRANSCEND

TRANSCEND

designed & crafted by HANDS

Refined Tables

The TRANSCEND collection is our most versatile and extensive conference and meeting platform. Clean lines and a timeless aesthetic embody the HANDS design philosophy. Cleverly engineered to be efficient and robust with market leading flexibility. These unique qualities mean the range can be universally specified enhancing

any meeting, conference and boardroom environment. Beautifully finished top surfaces, hand-crafted from the finest, sustainable natural veneers and solid timbers all elevated by an elegant chrome riser. TRANSCEND is the culmination of years of design development, feedback and refinement. Like all of our pre-defined collections, the

range can be uniquely tailored by clients to meet and often surpass their user's requirements, whether that need is for a complement of simple elegant meeting rooms or a large, sophisticated demountable boardroom facility with fully integrated IT.

TRANSCEND / Meeting Rooms

The meeting room. An environment where ideas and opinions are shared, where people collaborate to develop solutions and proposals. The TRANSCEND collection is perfectly designed to enhance any meeting room environment. Available in an extensive range of shapes and sizes to suit any format required. Single piece tops up to 3m long provide a clean and inspiring platform

from which the occupants can develop their dialogue. Able to cater for any table top connectivity with "through frame" cable routing nothing compromises the efficiency and effectiveness of the meeting at hand. Provided here with Chamfered edges, undercut to create a delicate and elegant feel. Finished in American white Oak or Tech-grain Macassar and harmoniously suited with PRECEPT

cantilever arm chairs. While in the background our SHADOW storage units cater for essential meeting peripherals and provide a platform from which to serve the occupants refreshments. As a collective they create an environment which is contemporary, stylish and productive.

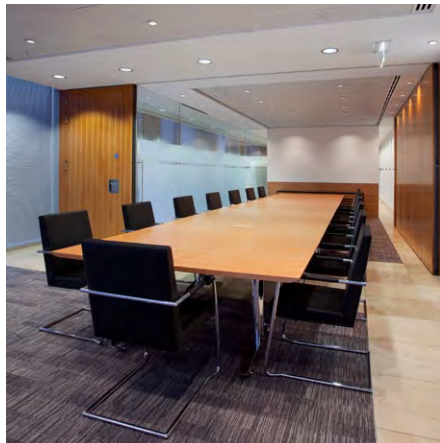

The beautiful environment showcased on the left is a mid-sized TRANSCEND meeting table finished in Zebrano veneer. Flush fitting “soft-close” access flaps allow users to integrate with the IT services, beautifully housed in the SHADOW media wall.

This unique freestanding system is cleverly supported by an inset structure and framed by a halo of soft, white light. Combined these complementary elements create a meeting/presentation space that is sure to impress in client facing rooms.

TRANSCEND / Boardroom

The TRANSCEND collection was developed with flexibility in mind. JUNIOR and SENIOR flip-top under frames have been developed to allow a user to have total flexibility across an infinite number of single, combined and multi-room meeting environments.

JUNIOR tables start from 1500mm x 750mm, while SENIOR tables are offered up to 2400mm x 1200mm on a single flip frame. Any multi-section tables are expertly manufactured with suited veneers allowing them to portray a “look as one” aesthetic. More often than not the only people who see that the tables are multi-section are the people responsible for changing the configuration.

Shown in Natural Cherry, the table above is made from three individual sections that can be quickly demounted and stored or combined with tables in the adjoining room to create a much larger meeting platform. For more examples of how the TRANSCEND range can be specified as a flexible system please visit www.hands.co.uk.

TRANSCEND has been specifically developed as a platform to cater for large conference and boardrooms. Offered in a wide range of shapes to meet the requirements of the contemporary meeting environment. From barrels and ellipses to tapered vase shapes and available in a wide variety of pre-defined sizes up to 9000mm x 2200mm. Using a lighter palette of beautiful veneers and with its clean and elegant chrome under structure, designers and end users alike can realise a stunning centre piece table that is light and elegant in feel.

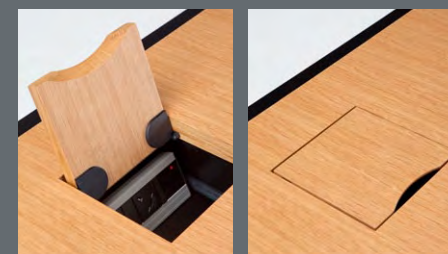

The centre piece of most contemporary meeting and conference suites is often the boardroom. Larger format TRANSCEND tables perfectly create an environment that has a high impact and gravitas. Suited veneers run along the joins of the table creating a single piece look and with the subtle curves of the barrel shape allow users to converse easily and effectively. All table top services are available via easy to reach soft close access flaps and are managed through the twin column bases ensuring the clean and contemporary look isn't compromised.

The static table illustrated could easily be specified as a flexible solution using SENIOR flip-top tables. This is particularly relevant if a dividing partition is utilised to create two separate meeting rooms when the room is not used as a collective space. To complement the centre piece table a twin screen feature SHADOW media unit offers a highly functional, stunning focal point at the business end of the space. Designed and meticulously detailed to coordinate with any TRANSCEND table. Shown with Precept High back swivel chairs.

TRANSCEND / Features

- TRANSCEND signature detailing includes an elegant chrome under structure with an arched, laser cut foot plate and cylindrical column riser.
- For both large static tables (where multiple tops are required) and flexible, multi-section pieces (where there may be a collection of individual tables that can be used as one) the grain direction would naturally follow the line of the joins to create the illusion of single piece top.
- Robust, hand operated linking devices ensure tops are perfectly level and aligned.

- Flush fitting "soft close" surface mounted access panels gracefully open to reveal IT, data and power connections. Cable management to the IT modules located under the soft close access flaps is facilitated via discreet cut-outs in the column risers ensuring the clean aesthetic of the range is not compromised.
- Offered in an extensive range of shapes and sizes combined with various top thicknesses, edge profiles and veneer finishes mean that the TRANSCEND range can be tailored to meet the functional and aesthetic requirement of any environment it occupies.

- Clear matt lacquers beautifully present the hand selected, suited natural veneers and timbers harvested from sustainable resources.
- TRANSCEND tables are supported by a sharp and concise blend of complementary elements; with credenza cabinets and elegant console tables affording the opportunity to create a statement piece environment.
- The PRECEPT executive seating collection synergises perfectly with the TRANSCEND collection; designed to offer premium comfort with a contemporary style edge. Available in a wide selection of styles and

proportions and upholstered in the finest fabrics and hides it combines with TRANSCEND to deliver a premium working environment that truly inspires.
