## KM<sup>3</sup> Storagewall & storage systems

KOMFORT FURNITURE & STORAGE

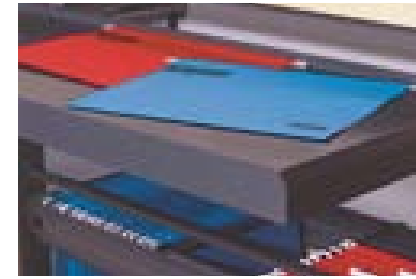

KM<sup>3</sup> storagewall divides offices, provides high volume storage and is totally flexible. Once installed, KM<sup>3</sup> uses the total vertical space from floor to ceiling height. It can generate a reduction of up to 30% over the original floor plan and consequently reduces the cost of floor space.

As well as being practical, multiple configurations and infinite panel finish options can be combined to create numerous different styles. A comprehensive choice of bay arrangements, from sliding doors to audio-visual, offers the ultimate storage solution.

KM<sup>3</sup> finished in grey MFC lines the core of a building and is used by the client to house both filing and essential services

Cherry veneer KM<sup>3</sup> suites with Klasic Cherry timber partition and trims

- 1 American Black Walnut veneer flush front AV unit with glass display cabinets
- 2 Central open display bays with pull out filing drawers below. Standard storage bays with double doors are adjacent
- 3 Rosewood veneered KM<sup>3</sup> matches the desk and door finish to provide a fully co-ordinated interior

Faceted KM<sup>3</sup>

The diverse uses of KM³ are evident in this run - lateral and pull out filing, shelving, wardrobes, glass display units, pass doors and audio-visual equipment.

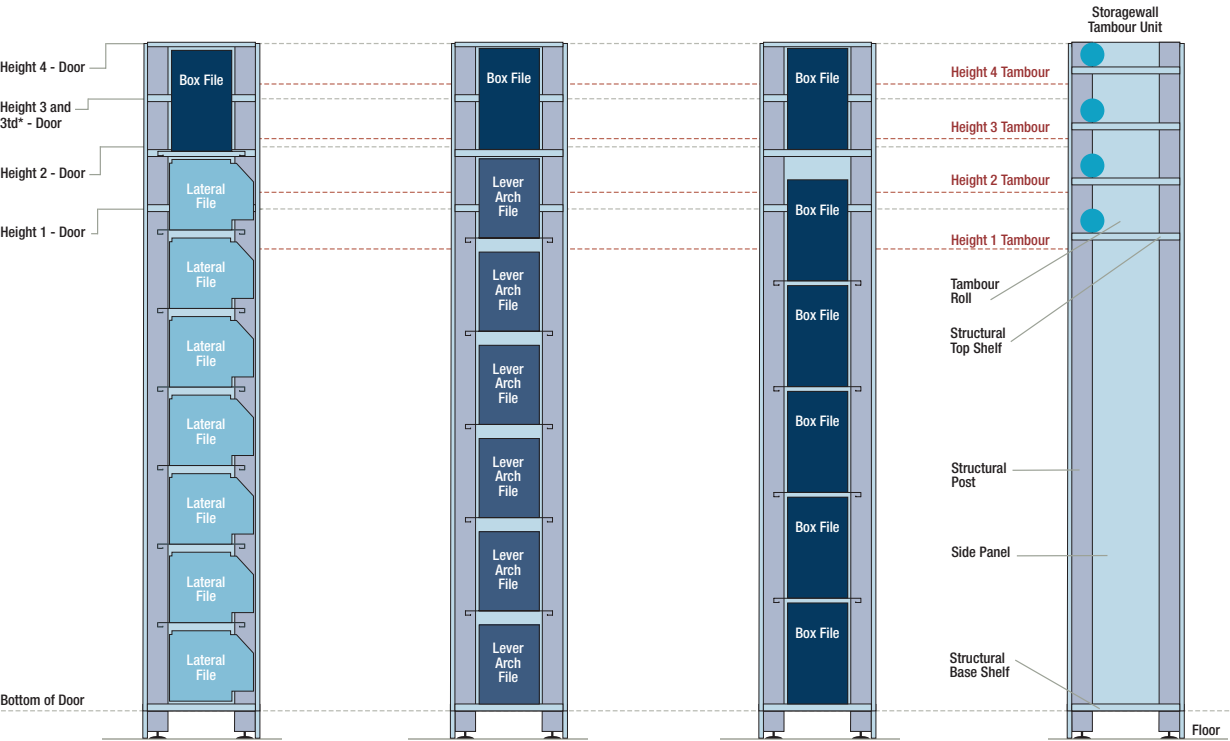

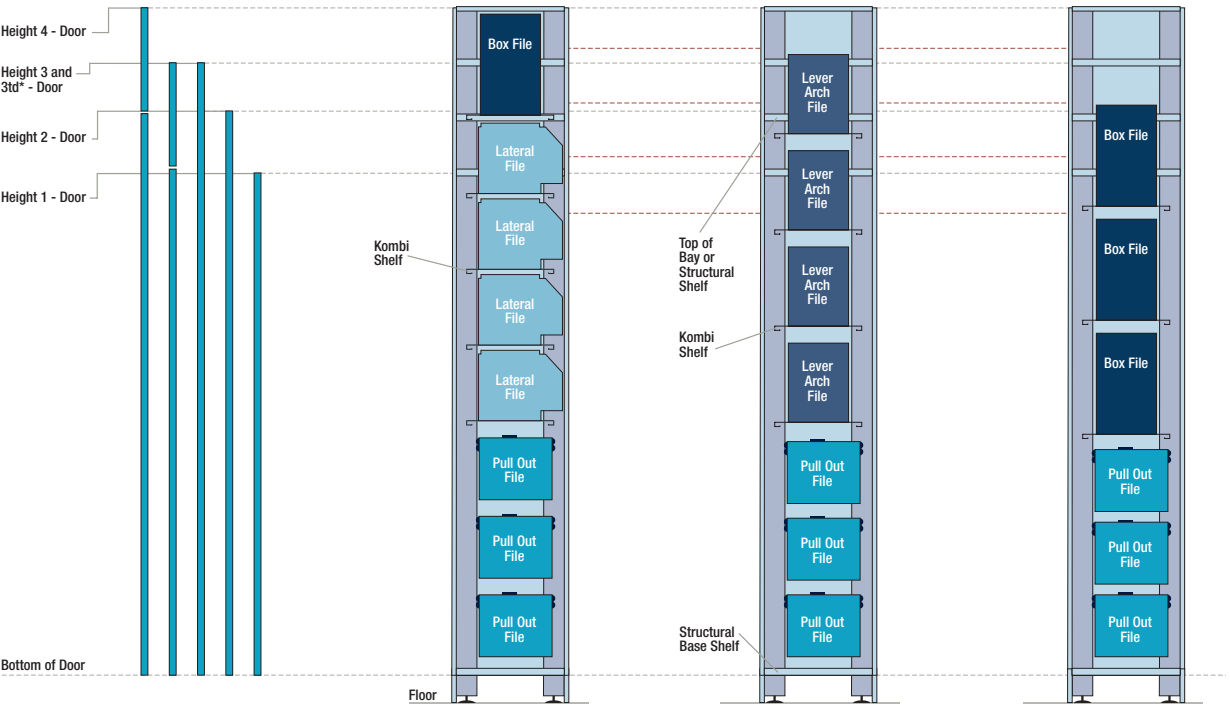

- 1 Island KM³ with adjoining room cabinets
- 2 Open plan desking with perimeter KM³ storage

Bi-fold doors with flush front AV unit

KM<sup>3</sup> storagewall filing specification guide

These pages are a quick guide to the filing permutations that can be installed within the KM<sup>3</sup> storagewall system. To use this quick reference guide select the height and configuration of the unit required, then place a ruler along and above the appropriate dotted line and read below the ruler to determine the number of units and filing permutations the storage will achieve.
